

Weekly Progress Report

Project Title: TBA (Powered heating and cooling model of buildings)

Week: 3

Date: 07/08/2026

Members Attendance

Member	ID/Name/Surname	Present
1	20448350 Adam Zaltsman	x
2	20937120 Bui Duc Minh Cao	x
3	21975066 Jake Pedersen	x

Work Completed

Task	Description/Outcome
Group Formed/Initial Admin	Formed a group during tutorial, set up a GitHub repository to consolidate documents and discussed how we'd communicate throughout the project. (Completed last week in the previous weekly report submission)
Change of Topic Choice	Changed to look at the energy requirements for heating and cooling of buildings Made a change after a discussion with Benchawan, who suggested we look at content more closely aligned with the unit.

Individual Contributions

Member	Contribution
Jake	Discussed the possible choices for the project and agreed to change.
Adam	Discussed the possible choices for the project and agreed to change.
Minh	Discussed the possible choices for the project and agreed to change.

Challenges Encountered

Realised first topic chosen would be irrelevant to the learning done in this unit.

Plan for Next Week

1. Conduct background research
 - a. Fluid motion of air within a building
 - b. Heating models of air
 - c. Other background heating and cooling sources
 - d. Think about location
 - e. Heating and cooling trends
2. Identify project requirements
 - a. Develop a model
